Step 4 — LED Headlights

- Use a Phillips #2 screwdriver to remove the two 2 mm screws on either side of the LEDs.

- Remove the LED board.

- (i) The LEDs are not symmetrical. This step is for the right side of the board, next to the power button. The left side is covered next.

Step 5

- Locate the LED headlights on the left side of the board.

- Pull the red wire attached to the LEDs perpendicular to the other wires to disconnect it.

Step 6

- Use a Phillips #2 screwdriver to remove the two 2 mm screws on either side of the LEDs.

- Remove the LED board.

To reassemble your device, follow these instructions in reverse order.
