## Step 1 — Battery

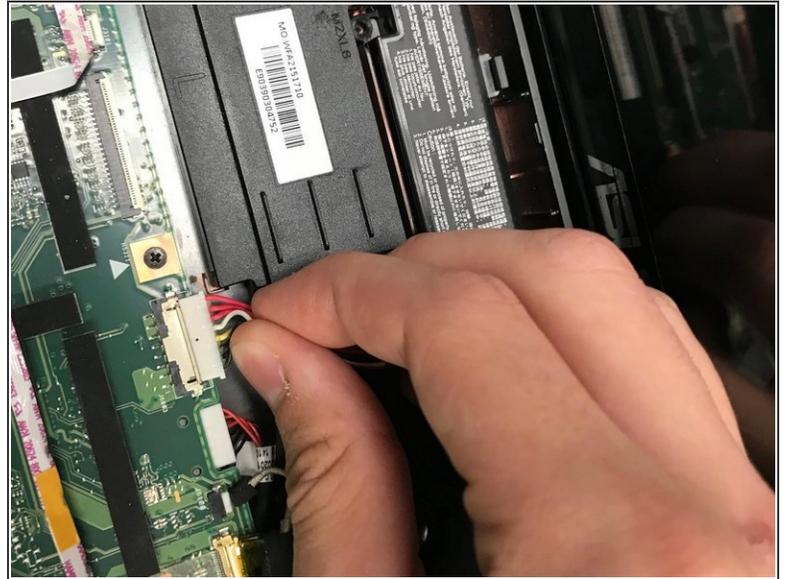

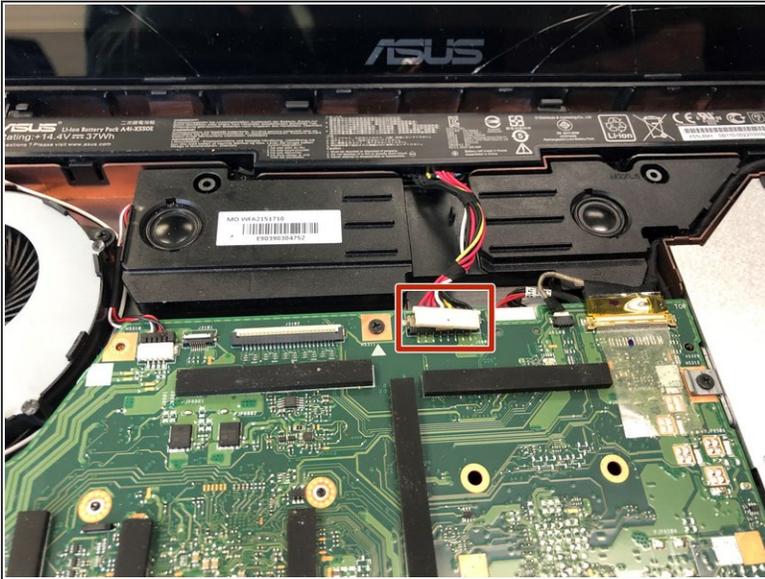

- Turn the laptop upside down and locate the ten screws holding in the plate cover.
- Remove all ten screws using a small Phillips head screwdriver.

## Step 2

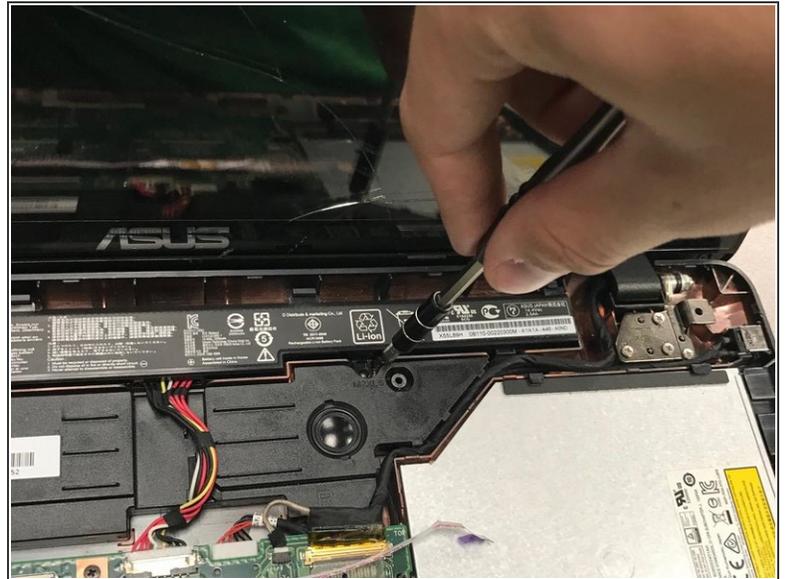

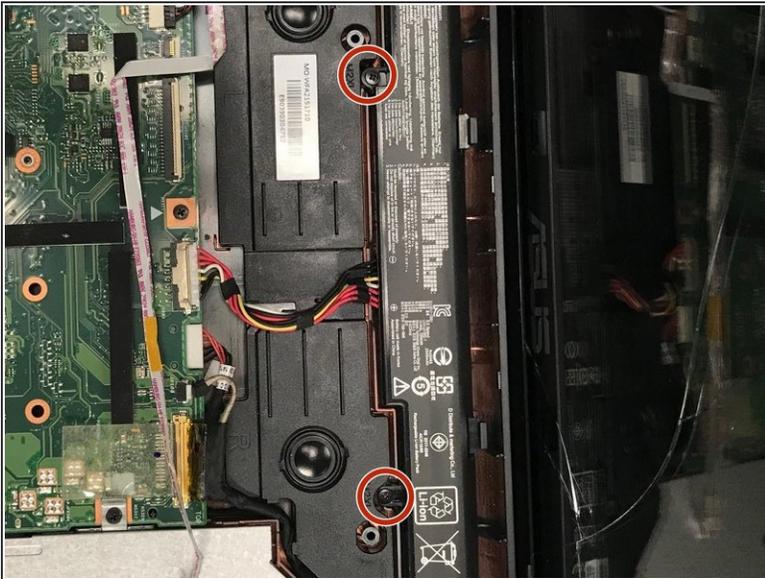

- Use a plastic opening tool to pry open and separate the keyboard from the plate cover carefully.
- ⓘ The actual keyboard will detach not the back cover.

### Step 3

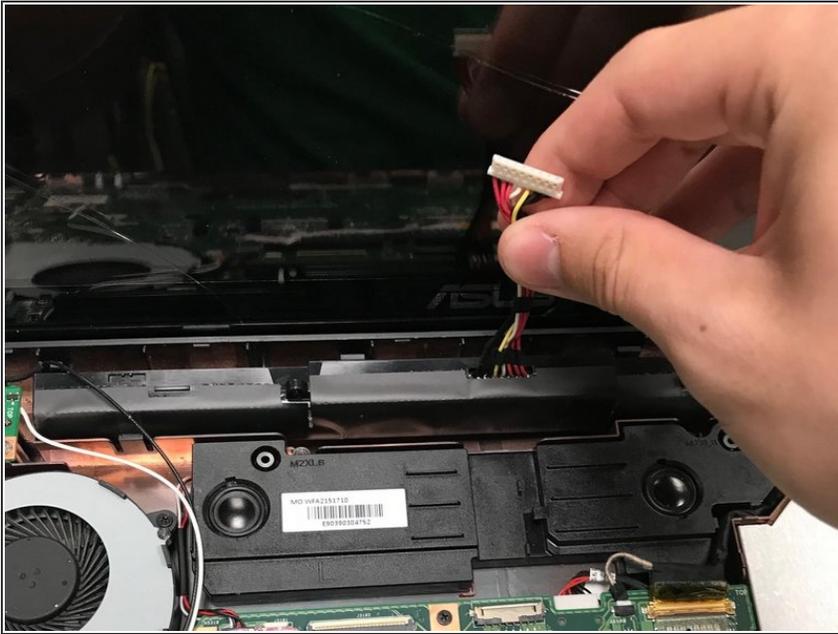

- The battery contains wires connecting it to a circuit board. Slowly pull up and disconnect the wires from the board by pulling on the white tab.

### Step 4

- Remove the two 7mm screws holding the battery in place using a Phillips #00 screwdriver.

## Step 5

- Carefully lift the battery up out of place.

To reassemble your device, follow these instructions in reverse order.
