Step 1 — Battery

ⓘ Be sure to power off and unplug your device before you begin your repair.

● Remove the 6 screws on the bottom plate of the laptop using a Phillips driver.
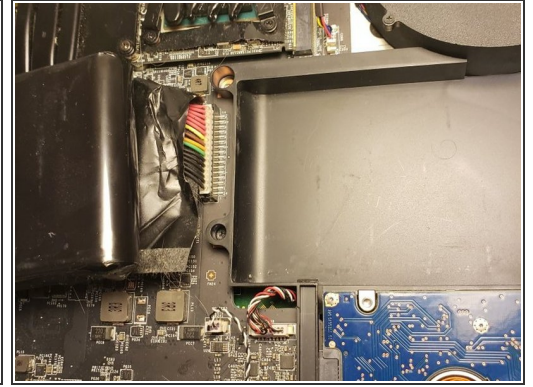

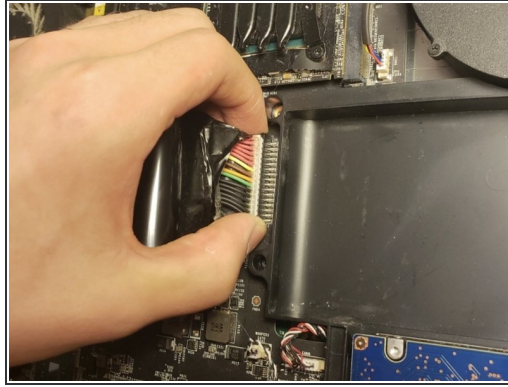

Step 2

- Insert the plastic opening tool into the back plate of the laptop and lightly pry it up.

⚠ The laptop cover will break if it is being handled roughly.

- Slide the plastic opening tool around the laptop's edge gently, slowly popping off the clips securing it into the laptop.

- Remove the back plate.

Step 3

- Locate the battery.

- (i) The wires are located at the back end of the battery and covered in tape.

- Remove the tape covering the battery connector.

- Place your hands at the corners of the wires.

- Pull upward from the back end of the battery where the wires are located.

- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
