## INTRODUCTION

If you are having troubles with your hard drive, this guide will teach you how to remove and replace it.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Keyboard

- Use a plastic opening tool and carefully pry the top panel from the base.

## Step 2

- Slowly lift the keyboard from the base.
- Disconnect the attached ribbon from under the keyboard.

### Step 3

- Remove the keyboard.

### Step 4 — Hard Drive

- Lay the laptop with the back facing up.
- With a Phillips #0 screwdriver, remove the eight 6mm screws on the back of the laptop.

## Step 5

- Slide the tabs outward to remove the battery.

## Step 6

- Flip the device so that you are facing the screen.
- Remove the ten 4mm screws on the silver panel under the keyboard using a Phillips #0 screwdriver.

## Step 7

- Using a plastic opening tool, remove the top panel of the laptop.

## Step 8

- Using a Phillips #0 screwdriver, remove the four 4mm screws connecting the hard drive.

## Step 9

- Remove and replace the hard drive.

To reassemble your device, follow these instructions in reverse order.
