

Lenovo Thinkpad T440s Hard Drive Replacement

This guide will show how to replace the Lenovo Thinkpad T440S Hard Drive.

Written By: Terelle Montalvo

INTRODUCTION

Is your device struggling to load files and applications? Consider using this guide to replace the hard drive of your device.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [Metal Spudger](#) (1)

PARTS:

- [1 TB SSD / Upgrade Bundle](#) (1)
- [250 GB SSD / Upgrade Bundle](#) (1)
- [500 GB SSD / Upgrade Bundle](#) (1)
- [2 TB SSD](#) (1)

Step 1 — Back Panel

- Make sure to power down and turn off your device before proceeding with the repair.
- Flip your laptop over so that the backside is facing you.

Step 2

- Using a Phillips #1 screwdriver, remove the eight screws securing the backplate.
- Don't try to force screws which won't come out. They are held in place by a stopper on the reverse side. This will not prevent you from removing the backplate.

Step 3

- Using the metal spudger, wedge it in the seam where the backplate meets the front plate and run the tool along the seam to separate the backplate.

Step 4

- Remove the back panel from the device.

Step 5 — Hard Drive

- Use the Phillips #1 screwdriver to remove the single screw securing the hard drive.

Step 6

- Use the metal spudger to lift the hard drive out of it's compartment.

Step 7

- Grab a hold of the hard drive and pull it straight out from the device.

To reassemble your device, follow these instructions in reverse order.
