

Repainting the Apple Logo

In this guide you will learn how to touch up the paint of the Apple Logo.

Written By: LisaGuide

TOOLS:

- [Dylusions Paint Pens, 6 Pack](#) (1)
-

Step 1 — Remove the Apple Lisa Front Pannel

- [Remove the Apple Lisa front panel.](#)

Step 2 — Poke Out the Apple Logo

- Using something small and thin, poke out the Apple logo from behind.

Step 3 — Painting

- Place the Apple logo on a painting friendly surface, I suggest newspaper. Painting tape doesn't work too well with this so you'll have to free-hand paint.

Step 4 — Reassemble

- Let dry for 1 day. Place the Apple logo back in the front panel and place the front panel back on the Lisa.

My Apple logo was chipped during shipping and these paint pens seem to work the best that I could find.
