

Moto C Plus Battery Replacement

Use this guide to remove and replace a worn out...

Written By: Dominik Schnabelrauch

INTRODUCTION

Use this guide to remove and replace a worn out battery in the Motorola Moto C Plus.

Before you begin, download the [Rescue and Smart Assistant](#) app to backup your device and diagnose whether your problem is software or hardware related.

TOOLS:

[Spudger](#) (1)

PARTS:

[Moto C Plus Battery - Genuine](#) (1)

Step 1 — Back Cover

 Power off your phone before beginning disassembly.

- Insert a thumbnail, or spudger, into the notch on the bottom right to start separating the phone unit from the back cover.
- Move to the bottom left corner and pry the phone unit out of the back cover until you can get a good grip.

Step 2

- Lift the phone out of the back cover.

Step 3 — Battery

- Use a spudger or fingernail to lift the battery starting at the notch on the bottom left.
- Lever the battery out of its recess and remove it.

To reassemble your device, follow these instructions in reverse order.

For optimal performance, after completing this guide, **calibrate your newly installed battery** : Charge it to 100% and keep charging it for at least two more hours. Then use your device until it shuts off due to low battery. Finally, charge it uninterrupted to 100%.
