

Toshiba Satellite L755-S5244 Battery Replacement

How to replace the battery in a Toshiba Satellite L755-S5244.

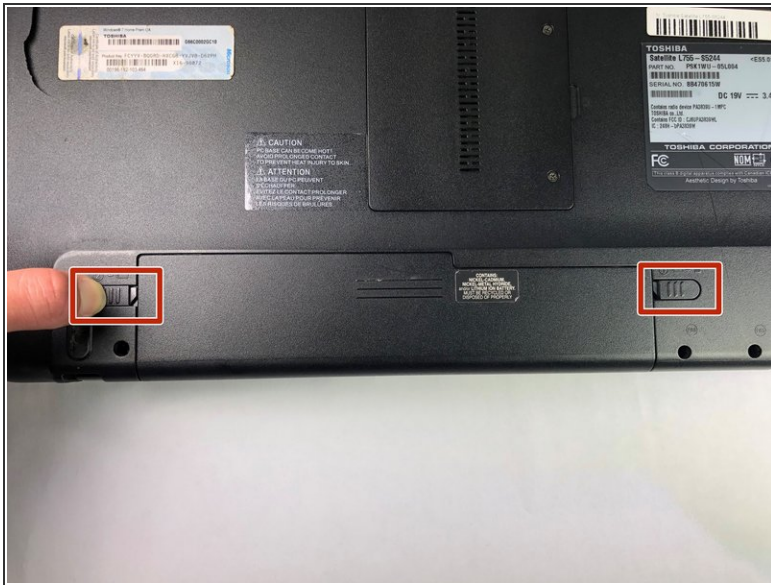

Written By: Anthony Buschini

INTRODUCTION

If your Toshiba Satellite L755-S5244 will not hold charge, has a very short battery life, or is overheating during use or charging, it may need replacement. The battery on the Toshiba Satellite L755-S5244 usually has a lifetime of 3 to 6 years and will steadily lose its ability to hold charge over time. The Satellite L755 uses a lithium-ion battery. Replacing the battery does not require any tools, or special parts, except a replacement battery.

Step 1 — Battery

- Turn the laptop upside-down, and face the battery toward you.
- Pull out the two tabs on either side of the battery. The tab on the right will stay pulled out, and the left one must be held out.
- Remove the battery and release the left tab.

The battery is successfully replaced.
