INTRODUCTION

This guide illustrates how to remove the Samsung Chromebook 3 XE500C13-K02US battery. You will need to open the device's back panel as the battery is located inside the case.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)
- Spudger (1)

Step 1 — Bottom Case

- Place the laptop back cover facing up to expose the screws.

- Using a Phillips #00 screwdriver, remove nine 4.6mm screws from the back casing.

Step 2

- Use an iFixit opening tool to wedge in between the case and body of the laptop.

- Once the tool is wedged in between the case and laptop, slide it around the entire laptop's edge to disengage the retaining clips.

- (i) You should hear a popping sound as you slide the iFixit opening tool around the laptop.

Step 3

- Remove the cover exposing the inside of the laptop.

Step 4 — Battery

- Remove the four 4.6mm screws with the Phillips #00 screwdriver.

Step 5

- Use the spudger to pry underneath the cable and gently lift the connector up.

Step 6

- Lift the battery up and out of the case.

To reassemble your device, follow these instructions in reverse order.
