## INTRODUCTION

This guide illustrates the process of removing the Samsung Chromebook 3 XE500C13-K02US speakers.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Bottom Case

- Place the laptop back cover facing up to expose the screws.
- Using a Phillips #00 screwdriver, remove nine 4.6mm screws from the back casing.

## Step 2

- Use an iFixit opening tool to wedge in between the case and body of the laptop.
  - Once the tool is wedged in between the case and laptop, slide it around the entire laptop's edge to disengage the retaining clips.
- i** You should hear a popping sound as you slide the iFixit opening tool around the laptop.

## Step 3

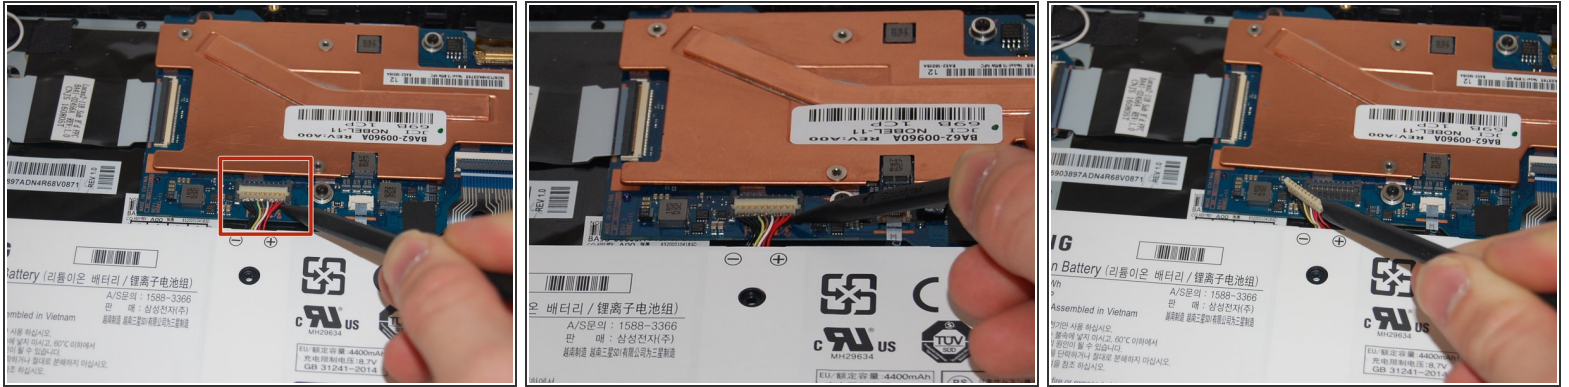

- Remove the cover exposing the inside of the laptop.

## Step 4 — Battery

- Remove the four 4.6mm screws with the Phillips #00 screwdriver.

## Step 5

- Use the spudger to pry underneath the cable and gently lift the connector up.

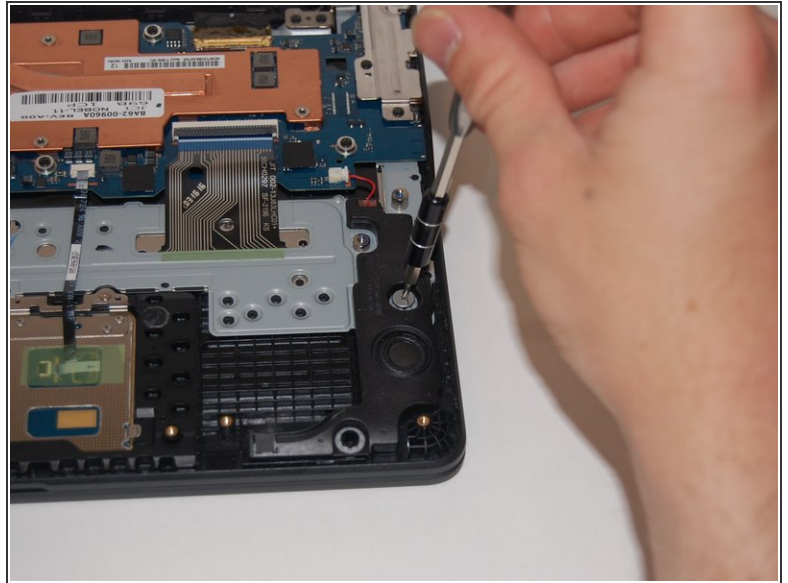

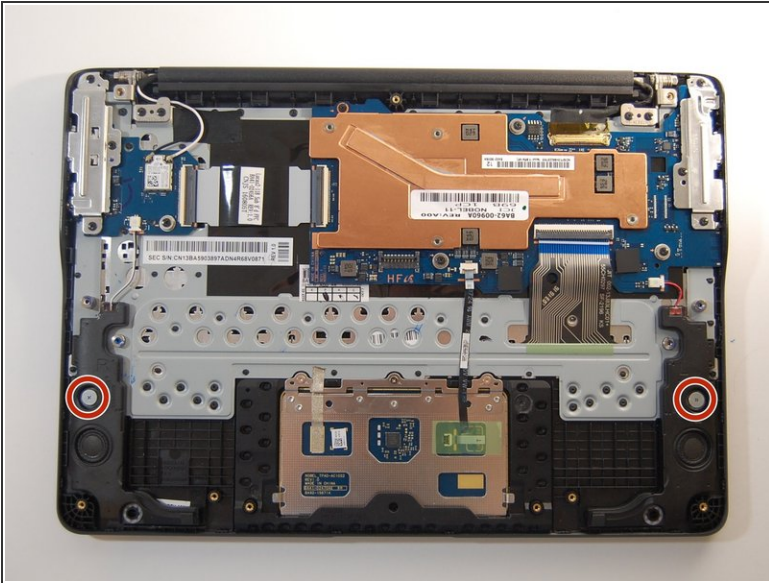

## Step 6

- Lift the battery up and out of the case.

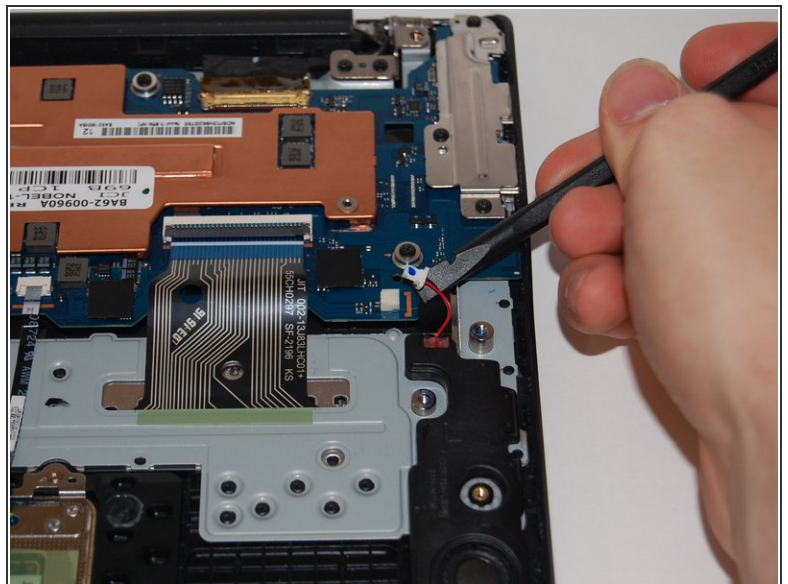

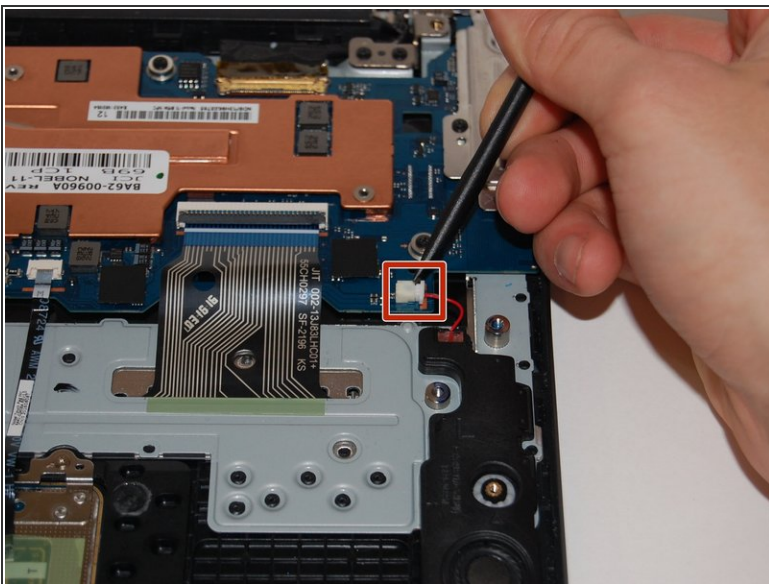

## Step 7 — Speakers

- Remove two 4.9mm silver screws with a Phillips #00 screwdriver.

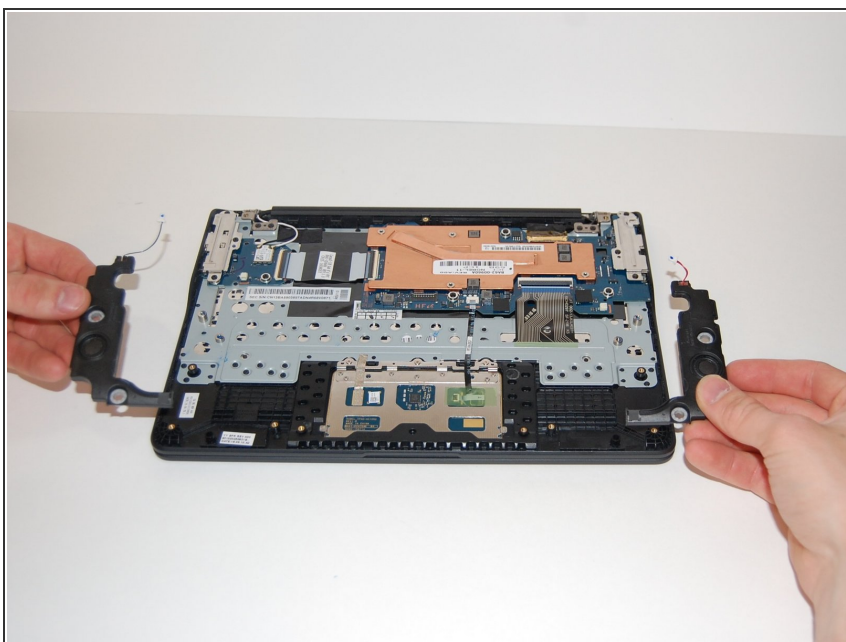

**i** Each speaker only has 1 screw.

## Step 8

- Use the spudger to pry the speaker connector sideways out of the motherboard.
- Repeat this step for the left speaker.

## Step 9

- Remove the speakers by lifting them upwards and out of the laptop.

To reassemble your device, follow these instructions in reverse order.
