INTRODUCTION

This guide will instruct you on how to remove and replace the battery of your Toshiba Satellite L55W-C5256. You may need to do so if:

- Your device will not hold a charge
- Your device will only power on when plugged into an AC adapter
- Your device will not power on or charge

Before beginning this replacement guide, it is recommended that you use an anti-static work mat and that you ground yourself using an anti-static wrist strap. This helps to protect your device from damage caused by static discharge. If you do not have these materials, you can find an anti-static wrist strap here, and an anti-static work mat here. To learn how to properly use an anti-static wrist strap and an anti-static work mat (recommended), see the guide found here.

🔧 TOOLS:

- iFixit Opening Tool (1)
- Magnetic Project Mat (1)
- Anti-Static Wrist Strap (1)
- Phillips #00 Screwdriver (1)

Step 1 — Battery

⚠ Before beginning this repair, power off your device and unplug all cables and accessory devices.

- Flip the laptop over so that the model numbers are facing the ceiling.

Step 2

- Use a Phillips #00 screwdriver to remove the 10 screws that secure the back cover to the device.
Step 3

- Gently use an iFixit opening tool to separate the back cover from the laptop. Go around all edges until plastic clips are completely free.

⚠ Ensure all plastic clips have been freed. Attempting to forcefully remove the back cover could result in damage to your device.
Step 4

⚠ Before touching any component inside your device, ensure you are properly grounded with an anti-static band.

- Disconnect the battery connector cable from the motherboard.

Step 5

- Using a Phillip's #00 screwdriver, remove the four 7.0 mm screws that secure the battery to the motherboard.

Step 6

- Lift the battery from the motherboard.

To reassemble your device, follow these instructions in reverse order.
