

Chevy s10 extreme pickup truck 1999

How to do a oil change in a 1999 chevy s10 extreme pickup truck.

Written By: Eddie G

TOOLS:

- [Torque Wrench](#) (1)
- [Socket 16mm](#) (1)
- [Hydraulic Floor Jack](#) (1)
- [Jack Stands](#) (1)
- [Oil Drain Pan](#) (1)
- [Funnel](#) (1)
- [Oil Filter Wrench](#) (1)

PARTS:

- [Oil Filter](#) (1)
- [Motor Oil 1qt 10W-30](#) (4)

Step 1 — Lift up truck

- There are two metal bars across the passenger and driver side to lift the car with a jack.
- ⚠ Make sure to have a tire or scissor lift gate under vehicle to not fall under while working
- ⓘ Have something block back tires from moving.

Step 2 — Remove old oil

- Its a 16 mm nut
- After all oil has drain reinsert the 16mm nut back and clean around it.
- ⓘ Have a bucket or container to collect the oil.

Step 3 — change the oil filter

- The filter can be seen from the tire.
- Apply the new filter with a dab of oil around the top for lubrication.
- ❗ If filter is hard to get loose consider buying a oil filter wrench.

Step 4 — Add oil

- Add 4 qt of oil
- ★ Check under vehicle to make sure there is not oil spilling.

Congratulation you have successfully done your first or another oil change.
