

# Xiaomi Redmi Note 4X Battery Replacement

In this guide we will be replacing the Redmi Note 4X's 4000mAh Battery

Written By: Isaiah Kochis

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Removing the back cover

- The first thing we have to do is use a pry tool to remove the back cover (make sure to remove the sim tray first)

## Step 2 — Removing the Battery

- Now we have to remove the battery, luckily the Battery can be removed first after taking the back cover off.

## Step 3 — Reassembly

- Now you can insert your new battery, pop the back cover on, and your good to go! Congratulations, you've just replaced your phone's battery.

Congratulations on repairing your smartphone!
