

Lenovo Thinkpad T450 Cables and Plastic Replacement

This guide will show you how to remove cables and plastic covers in the Lenovo ThinkPad T450 laptop.

Written By: Justin Ogihara

INTRODUCTION

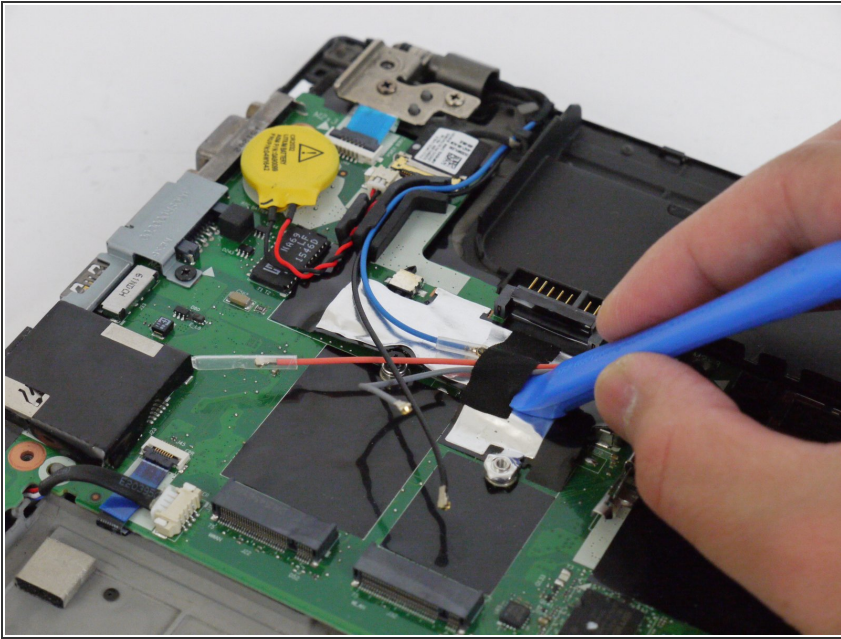

Prerequisite-only guide.

TOOLS:

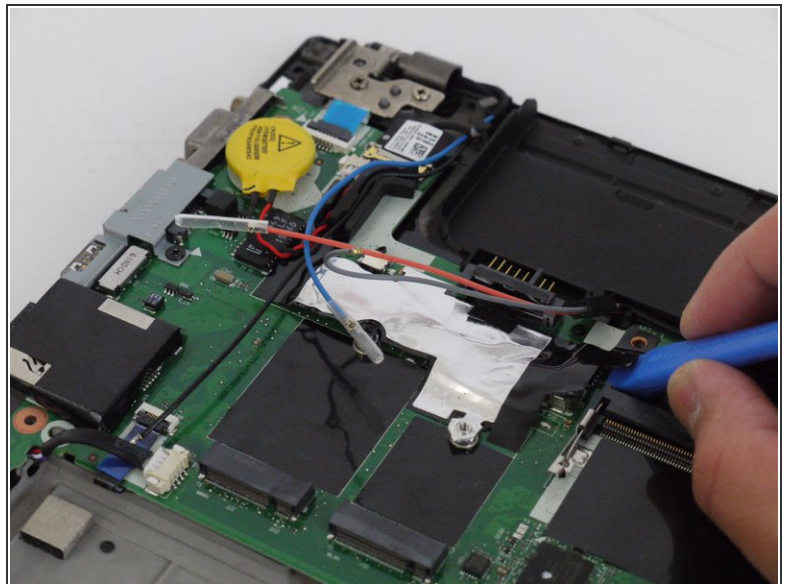

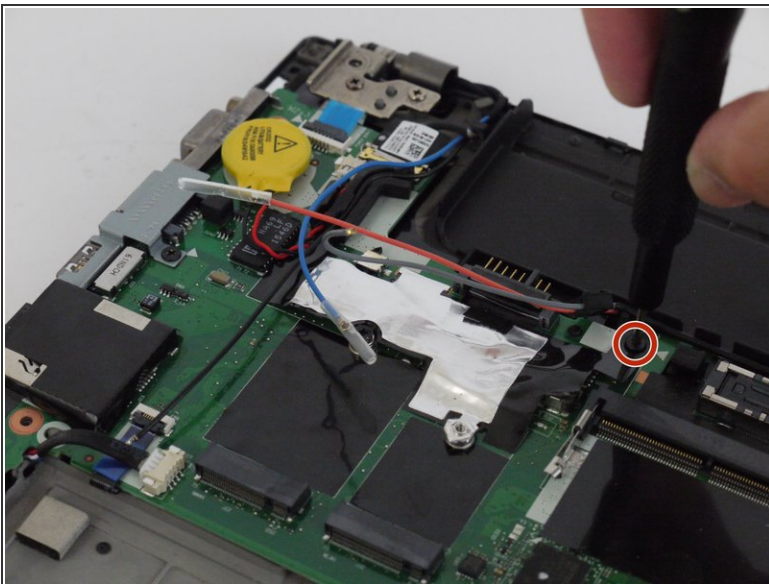

- [JIS #00 Screwdriver](#) (1)
 - [iFixit Opening Tool](#) (1)
-

Step 1 — Cables and Plastic

- Use the plastic opening tool to remove the black piece of tape holding the cables together.

Step 2

- Use the JIS #00 screwdriver to remove the single 2.8 mm screw from the motherboard.
- Remove the black plastic covering the motherboard.

To reassemble your device, follow these instructions in reverse order.
