# INTRODUCTION

This is a guide for how to replace a Lenovo IdeaPad Flex 5-1470 motherboard. Common reasons to replace the motherboard are because of overheating, power surges, old age or just overuse.

## TOOLS:

[iFixit Opening Tool](#) (1)  
[Phillips #00 Screwdriver](#) (1)

## PARTS:

[5B20N67526 - Lenovo Laptop Motherboard - Genuine](#) (1)  
[Lenovo Flex 5-1470 and Flex 5-1570 Motherboard](#) (1)  
[Lenovo Yoga 520-14 and Flex 5-1470 Motherboard](#) (1)

## Step 1 — Back Panel

- Remove all ten 6.6 mm screws with a Phillips #00 screwdriver.

## Step 2

- Use the plastic opening tool to lift up and remove the casing.

## Step 3 — SSD

- Remove the single 3.6 mm screw using a Phillips #00 screwdriver.
- ⓘ The SSD will pop up on its own after removing the screw.

## Step 4 — Motherboard

- Use a Phillips #00 screwdriver to remove the three screws securing the fan.
- Lift the fan up and out.
- Use a Phillips #00 screwdriver to remove the three screws securing the hard drive.
- Lift the hard drive up and out.

## Step 5

- Use a Phillips #00 screwdriver to remove the single screw securing the Wi-Fi card.
- ⓘ The Wi-Fi card will slightly lift away from the motherboard.
- Pull the Wi-Fi card directly out of its port.

## Step 6

- Use a Phillips #00 screwdriver to remove the three screws securing the motherboard.
- Gently disconnect the cables and ribbon cables connected to the motherboard.

To reassemble your device, follow these instructions in reverse order.
