Step 1 — Battery

- Remove the rear case by using moderate force to pry the divot on the left of the rear facing camera with a plastic opening tool or your fingernail.
- Continue to lift the case, working your way around the perimeter until the entire rear cover is removed.

Step 2

- Lift the battery upward with your finger or plastic opening tool by pushing on the notch located on the bottom of the battery.
- Remove the battery from the phone.

Step 3 — microSD Card

- Gently slide out the SD card using your fingernail or a plastic opening tool.

☑ For reassembly, gently slide in the microSD card until it stops.

To reassemble your device, follow these instructions in reverse order.
