

# Kid Galaxy Morphibians Explorer Axle Replacement

Replacing the driving axles of the Kid Galaxy Morphibians Explorer.

Written By: Rusbell Gonzalez

## PARTS:

- [Phillips #00 Screwdriver](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Axle

- Remove both 8.0 mm Phillips #1 screws, one for each wheel.

## Step 2

- Remove the wheels by pulling them away from the RC car.

### Step 3

- ⓘ Make note of where each driving gear cover is placed. They only go in one way.
- Remove the eight 8.0mm Phillips #00 screws, two screws for each wheel.

### Step 4

- Pry open the two gear covers on both sides.

## Step 5

- Pull the driving gears off the axles by sliding them off the axles and exposing both axles.

## Step 6

- Slide both axles from the internal axles guides within the car.
- Reverse the steps to replace the axles.

To reassemble your device, follow these instructions in reverse order.
