

# Toshiba Satellite Click Keyboard Keys Replacement

How to replace a single key on a keyboard.

Written By: Andre

---

## INTRODUCTION

This guide will show you how to remove and replace the keys on a Toshiba Satellite keyboard. Replacing a key can be accomplished using one finger and a pry tool.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
-

## Step 1 — Keyboard Keys

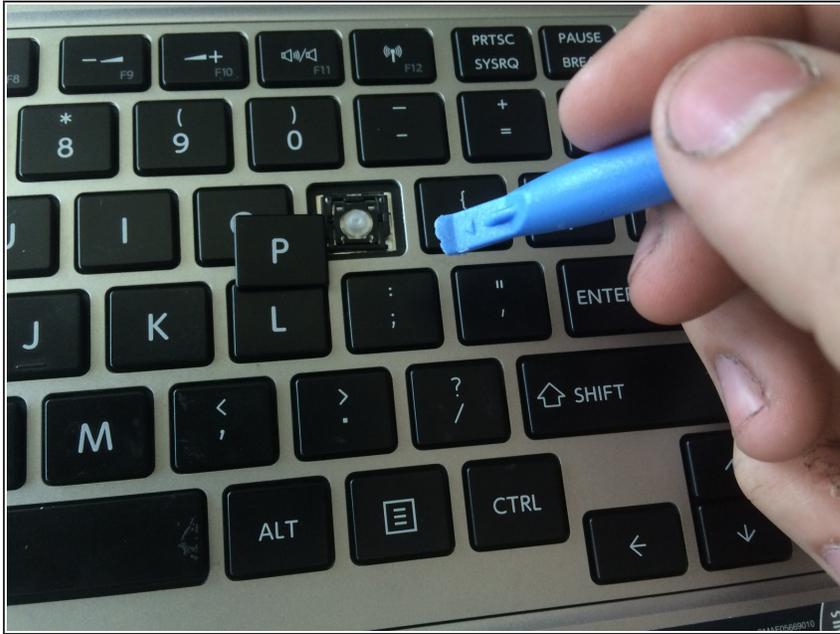

- First, identify which key(s) need to be replaced, and make sure a replacement key is purchased, i.e. the 'p' key.

## Step 2

- Take the plastic opening tool and wedge it under the key you are replacing.

### Step 3

- Take the tool and pry the designated key completely off of the keyboard.

Repeat steps for all other keys on keyboard.
