Step 1 — WWAN Board

(i) If present, carefully peel the piece of tape covering the WWAN board.

Step 2
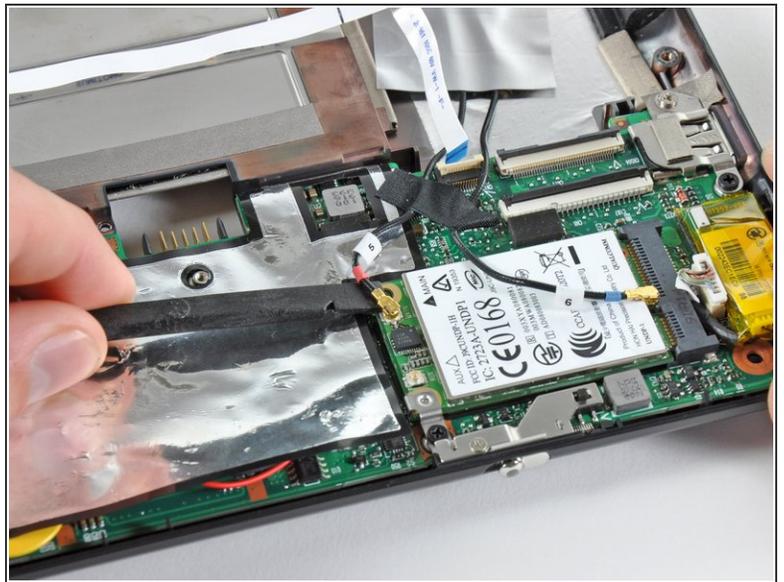

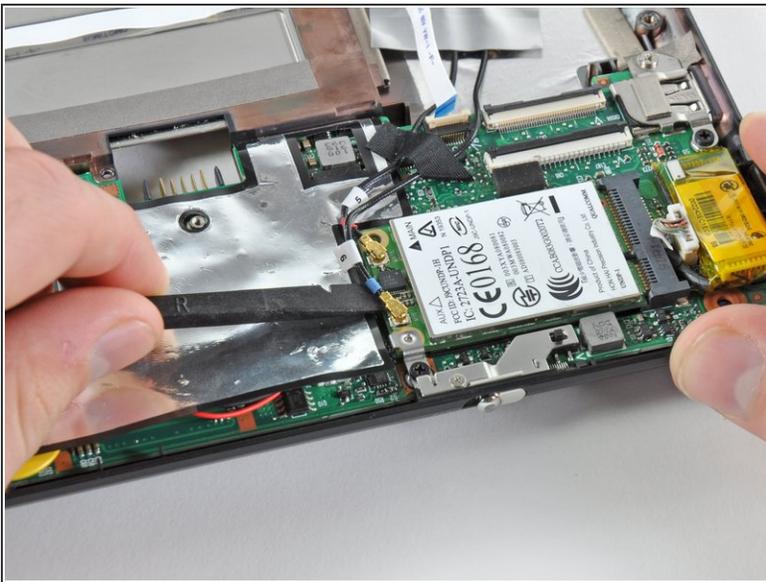

- Pry the WWAN antenna connectors (2 total) up off the WWAN board.

- ★ During reassembly, remember to correctly connect the antenna cables to their respective terminals. The red labeled antenna is connected to the **"MAIN"** terminal and the blue labeled antenna is connected to the **"AUX"** terminal.

Step 3

- Remove the single 3 mm Phillips screw securing the WWAN metal bracket and WWAN board to the motherboard.

- During reassembly, before securing the WWAN board to the upper case, be sure the metal bracket is correctly placed (as highlighted in the second picture).

⚠ Be cautious of the metal bracket's displacement. It can easily become lost during disassembly.

Step 4
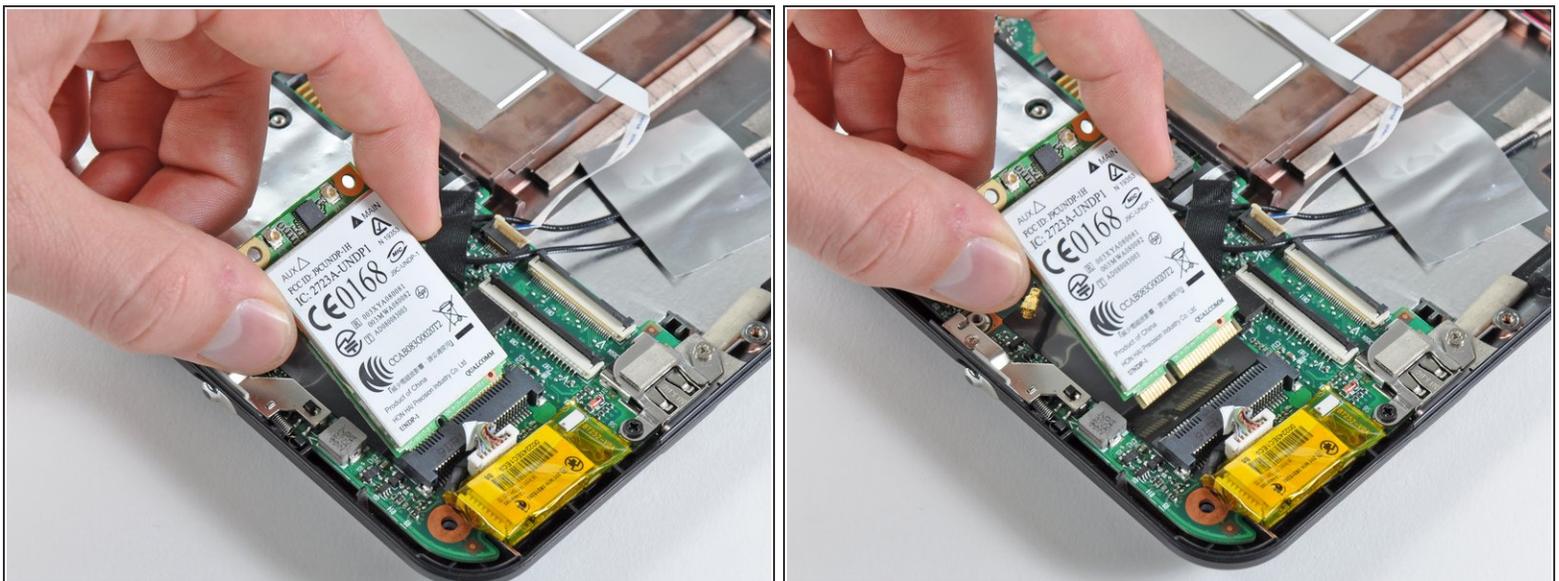

- ⓘ Upon removing the Phillips screw that secures the WWAN board to the motherboard, the WWAN board should pop up from its left side.

- Grasp the WWAN board and pull it straight out of its socket on the motherboard.
