INTRODUCTION

This guide requires a Phillips #00 screwdriver

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

This document was generated on 2020-11-26 12:34:59 PM (MST).

Step 1 — Battery

- Unplug the laptop from the power adapter and turn the power off.
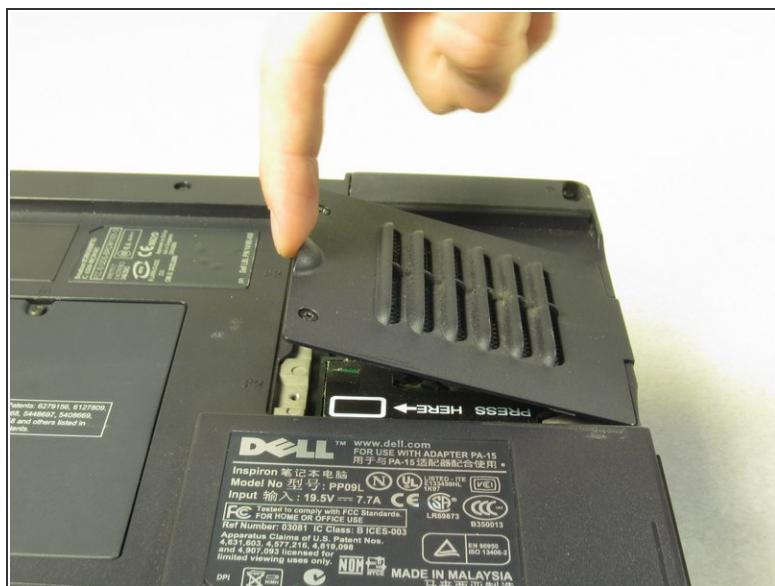

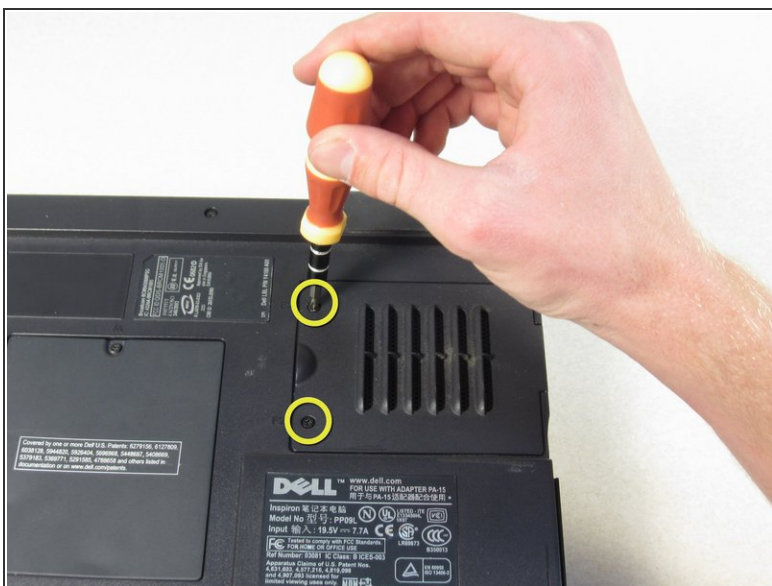

⚠️ Failure to unplug laptop before proceeding could result in risk of electric shock!

Step 2

- Slide the battery-lock tab and hold.

- Flip the battery away from the chassis to remove it.
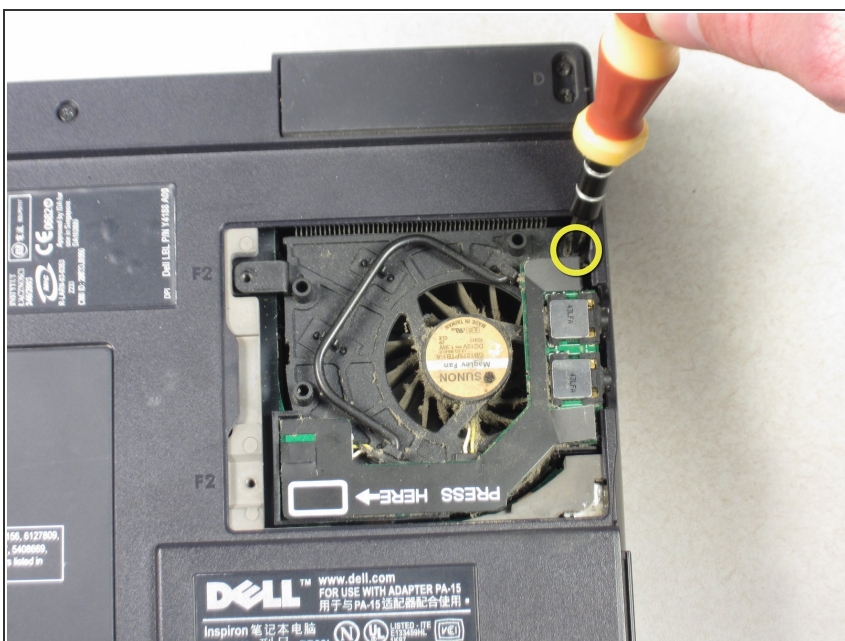

Step 3 — Fan 2

- Undo the two screws on the fan cover labeled "F2"

- (i) These screws will remain in the panel

- Remove cover plate.

Step 4

- Remove the single 6mm screw holding the fan in place.

Step 5

- Flip the handle up.

- Use the handle to pull the fan away directly up, away from case.

To reassemble your device, follow these instructions in reverse order.
