INTRODUCTION

This mouse was first released in September 2003, has one button, and uses a Bluetooth 1.1 connection.

Step 1 — Apple Wireless Mouse Teardown

- This is the Wireless Mouse sad because on it's own.
- This is the Wireless Mouse even more sad next to it's amazing brother, The Magic Mouse!

Step 2

- This is the battery door from the magic mouse. (There was a small metal piece glued to the brown spot, but it has been lost).

To reassemble your device, follow these instructions in reverse order.
