## Step 1 — AirPort/Bluetooth Card

- Remove the two 3.3 mm T5 Torx screws securing the AirPort/Bluetooth card to the logic board.

Step 2
- Slightly lift the AirPort/Bluetooth card and pull it straight out its socket.

⚠ Do not use excessive force to pull the end of the AirPort/Bluetooth card away from its socket on the logic board. Doing so may damage the socket.

⭐ When reinstalling the card, be sure it is properly seated before reinstalling the retaining screws.

  ⓘ If the AirPort/Bluetooth card is properly seated, its screw holes should align with those on the logic board.
