

Canon AE-1 SLR Lens Mount Replacement

This guide will demonstrate how to remove the SLR Lens Mount on the Canon AE-1.

Written By: Joe Blumberg

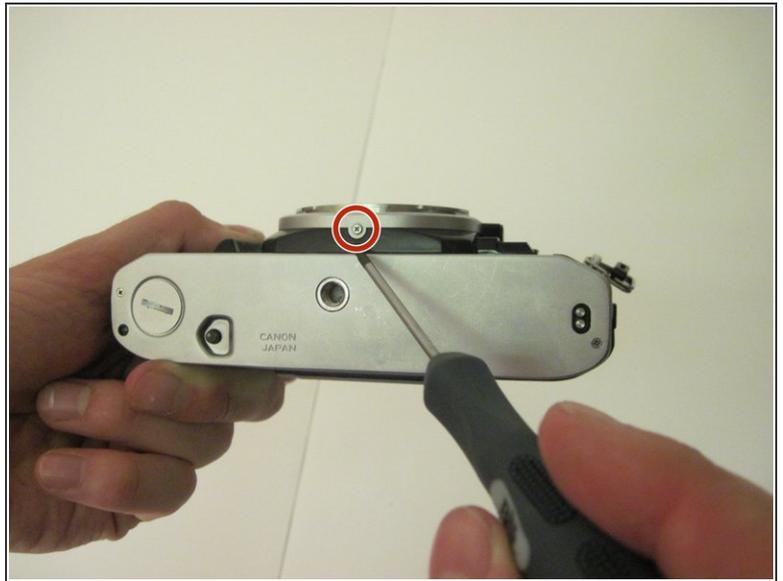

INTRODUCTION

This guide will teach the user how to remove a damaged SLR lens mount on the Cannon AE-1. The SLR lens mount allows the user to connect different lens to the Canon AE-1.

TOOLS:

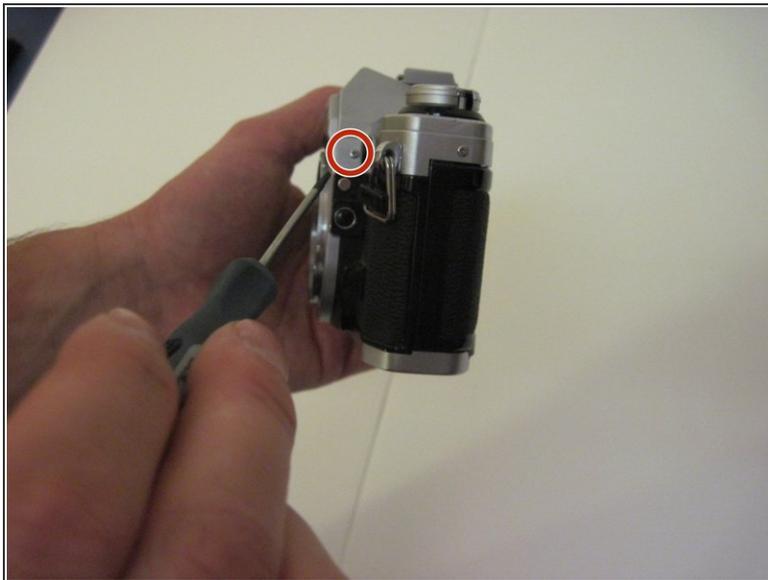

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — SLR Lens Mount

- Remove the first set of two screws from the lens outer casing using a Phillips #00 screwdriver.
 - ⓘ The first set of screws is located on the front and bottom of the lens casing.

Step 2

- Remove the remaining two screws from the right and left sides of the lens outer casing using a Phillips #00 screwdriver.

Step 3

- Remove the lens casing by pulling it away from the body of the camera.

Step 4

- Remove the four #00 screws from the SLR lens mount using a Phillips #00 screwdriver.

Step 5

- Pull the SLR lens mount away from the body of the camera.
- ⓘ Be aware that a pin will fall out when the SLR lens mount is removed.

To reassemble your device, follow these instructions in reverse order.
