

Western Saddle Fender Replacement

In this guide the reader will learn how to properly replace the fender on a western saddle.

Written By: Mackenzie Pagliai

INTRODUCTION

In this guide the reader will learn how to properly replace the fender on a western saddle. The repair will require a new saddle fender. It is easiest to perform this replacement while using a saddle stand, but it is not required.

Step 1 — Western Saddle Fender

- Unbuckle the fender.

Step 2

- Remove the stirrup from the fender.

Step 3

- Pull on the fender leather to remove the fender from the saddle.

Step 4

- Remove the hobble and bleavins from the new stirrup.

Step 5

- Run the new stirrup leather over the bar.

Step 6

- Bring the fender leather out on the underside of the saddle.

Step 7

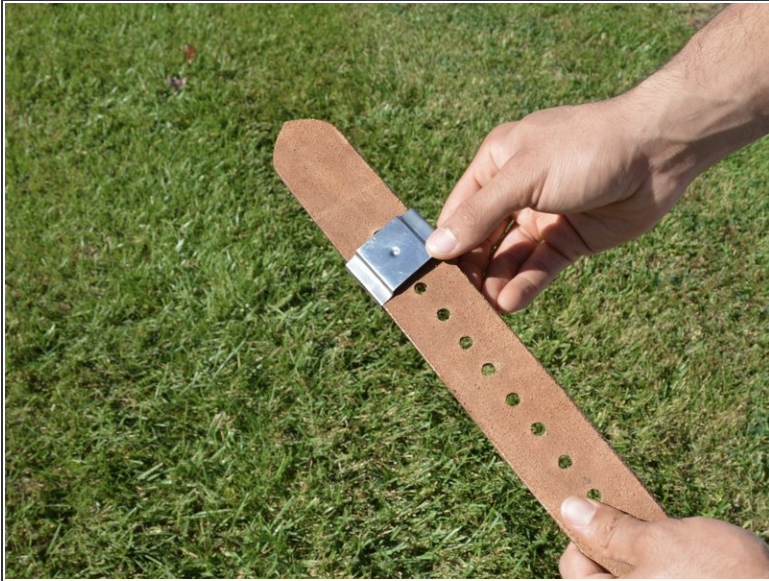

- Push the leather back under the bar over the rigging.

Step 8

- Pull the stirrup leather tight.

Step 9

- Put stirrup, blevins, and hobble back on the new stirrup.

Step 10

- Slide the blevins over the stirrup holes.

Step 11

- After the fender is fixed the saddle should be ready to ride.

The fender is replaced and you are ready to ride!
