INTRODUCTION

Use this guide to replace a defective USB, HDMI, and audio jack circuit board in your Toshiba E45t-B4300.

🔧 **TOOLS:**

Phillips #0 Screwdriver (1)
Spudger (1)

Step 1 — Battery

⚠️ Power off your laptop before continuing.

- Remove the following two 4mm screws with a Phillips #0 screwdriver.

Step 2

- Slide the battery out towards you.
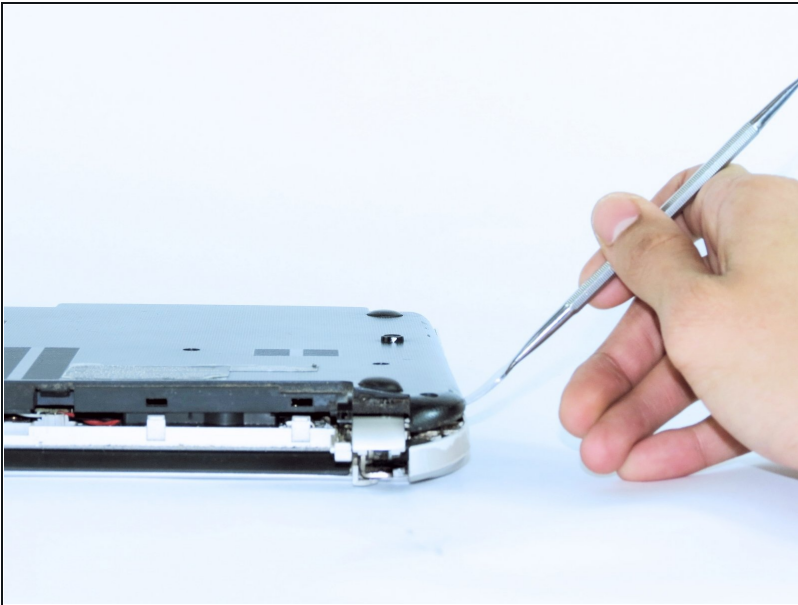

Step 3 — Bottom Case

- Remove the following twelve 4mm screws with a Phillips #0 screwdriver.

Step 4

- Use a spudger to depress the six white clips connecting the plastic cover
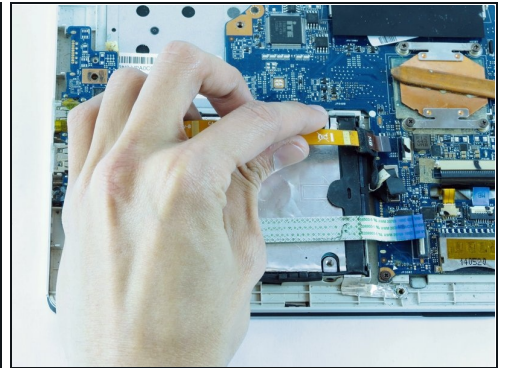

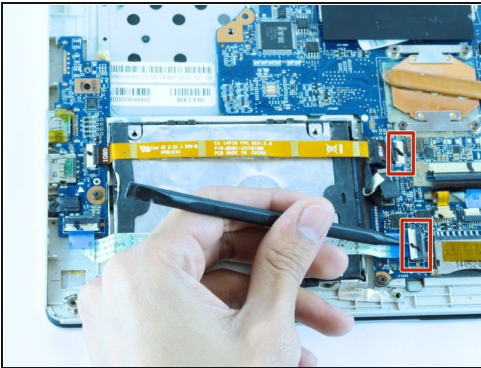

Step 5

- Run the spudger or a [plastic card](#) around the entire laptop to release the rest of the clips.
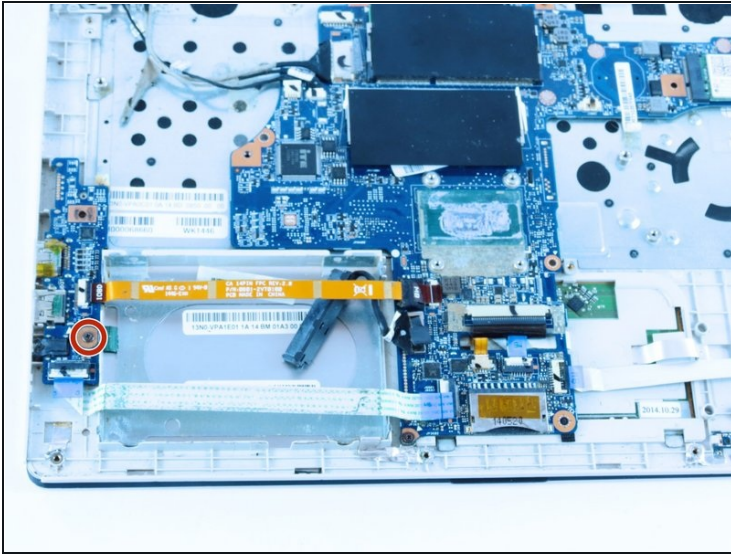

Step 6

- Remove the cover and set to the side.

Step 7 — USB HDMI Audio Circuit Board

- Use the point end of the spudger to lift the clips that attach the two ribbons to the motherboard.

- Pull out the ribbons from the motherboard.

Step 8

- Unscrew the 2mm screw with a Phillips #0 screwdriver.

- Remove the circuit board.

To reassemble your device, follow these instructions in reverse order.
