Step 2

- Squeeze the plastic opening tool between the black plastic and foam pad on non mic side and then pry upwards to remove the felt pads covering the speaker.
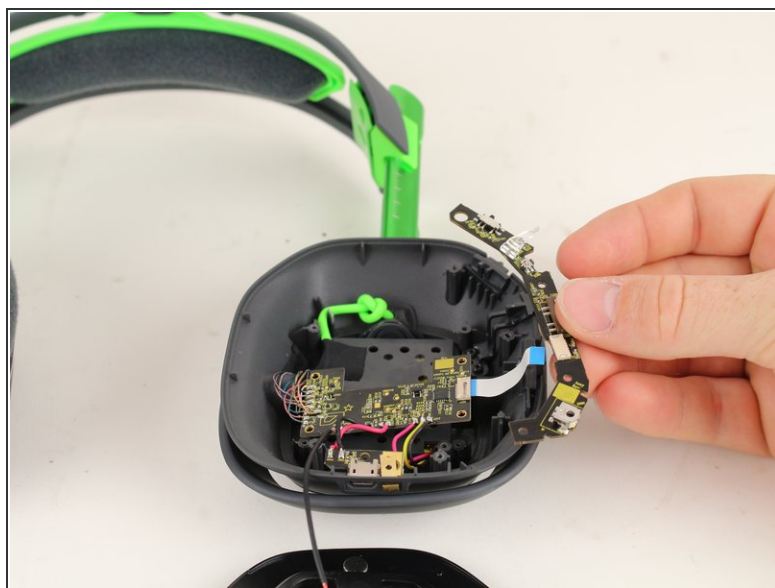

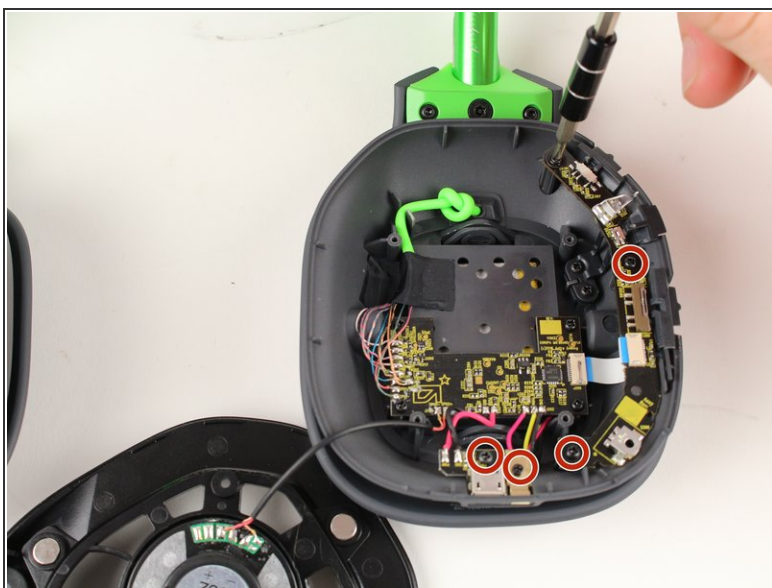

Step 3

- Remove the four 6mm Phillips 1 screws.

Step 4

- Lift the speaker module up off the device.

Step 5 — Headset Battery

- Remove the five 6mm PH1 screws.

- Remove the buttons panel by pulling the panel away from the white ribbon cord.

Step 6

- Remove the four 6mm PH1 screws.

- Remove the tape holding the wires connected to the motherboard.

Step 7

- Remove the back panel by squeezing the two tabs together and pushing out.
